Outline

1. Problem statement
2. Testing complex distributed architectures
3. Demo Time
4. Worth thinking about

Let's start

1 Problem statement

2 Testing complex distributed architectures
- Contract Testing

3 Demo Time

4 Worth thinking about

Problem Statement

„Clean code can be read, optimized and further developed by a developer other than the original creator. It has unit tests and acceptance tests” – Dave Thomas

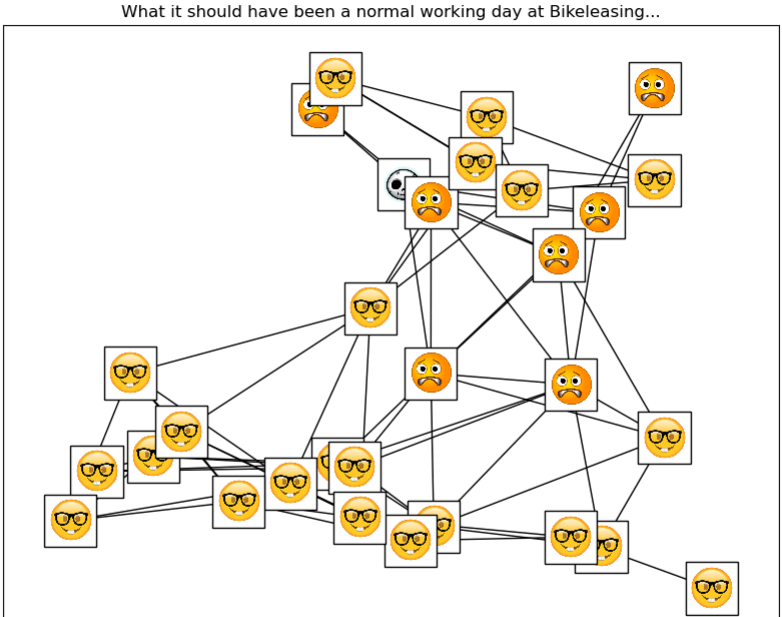
Problems

- Local changes, even if tested, do not assure that the system as whole is working

Problems

- Local changes, even if tested, do not assure that the system as whole is working
- Loosely coupled architecture but tightly coupled teams

Embedded Animation



1 Problem statement

2 Testing complex distributed architectures
- Contract Testing

3 Demo Time

4 Worth thinking about

Hintergrund

- ja, something

Hintergrund

- ja, something
